

- **Two Year Regular Program**

If you are a student of class XI, and wish to start early for better concept building, then this two year classroom course is ideal for you. This course helps build a good foundation and enhances your analytical and scientific approach with better numerical solving skills. Over a period of two years, this course refines your concepts and fundamentals all through class XI and XII. More than adequate study material is provided to the students in both the academic sessions to help them in basic concepts and their applications.

This program is supported by a comprehensive set of assignments and question banks that covers diverse types of problems and objective questions through out the two academic session

Tests, based on a pattern similar to that of **Indian Institute of Technology - Joint Entrance Examination (IIT-JEE)**/PMT are conducted periodically to monitor and evaluate the performance of students. Regular doubt clearing sessions are conducted not only to improve the understanding of students but also to give them individual attention and a healthy interaction with the concerned **Head of the Departments** (HODs) and senior members of the faculty.
